OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 18

THE REDCLIFF REVIEW, THURSDAY, JUNE 26th, 1930

Number 16

Town Will Prosecute Careless Water Users

Tape Must Be Shut off In Prohibited Hours.

There was a quite session of the Town Council last Monday evening as very little business of importance came before the meeting.

After the reading and adoption of the minutes Geo. McKay engineer at the pump station, waited on council and explained the difficulty experienced in keeping the tank full of water since so many householders were drawing so heavily on the supply for watering gardens. After some discussion it was decided that more strict attention be given to those who disregard the hours allotted for watering purposes and that those doing so be prosecuted. Mr. Kitchen was also given authority to supply assistance at the pump station when necessary to keep up a safe supply of water for domestic and emergency use.

A letter was read from Mr. Baird regarding the lease entered into between the town and R. Duffield. The letter explained the position between the town and the licensee.

A letter was read from the Solicitor of the C.P.R. acknowledging receipt of tax notice and stating it was not the intention of the company to appeal this year.

A letter was read from the Dominion Air Industries making an offer of \$150 for specified machinery in the old Ornamental Iron works. The offer was accepted.

Jules Lavigne wrote offering \$30 for shack on 2nd St. The offer was accepted on motion of Councillors Champ and Shaw.

Ald. Dixon made application for a dance license for the airplane factory building in Lockwood. The license was granted on motion of councillors Shaw and Brydie.

A Bylaw regulating hours for watering gardens, lawns, etc. and fixing severe penalties for non-observance of same was given its several readings and passed.

Mr. Kitchen was appointed Wood inspector for the town for 1930.

Two Shows at Cameo Next Week

Will be held on Monday and Tuesday Evenings.

On Monday evening at the Cameo the famous picture "Big News" will be shown. The inner sanctum of a big newspaper is the fascinating locale of this picture.

On the efforts of the paper to land a story hitting at the activities of a liquor and narcotic ring is hinted rapid fire action in which thrills are said to be fast and furious.

There will also be a good comedy and Pathé review.

On Tuesday evening there will be a special picture "The Foreign Legion" which will be especially in keeping with the Dominion Day Celebration. This is said to be one of the best showing this season and may be seen at the usual prices. There will be a good comedy.

The Prince of Wales celebrated his 36 birthday last Monday.

Hector Lang Elected With Good Majority

Blanchard Heads the List in Redcliff Poll.

Mr. Hector Lang, Liberal candidate for this constituency was elected in last Thursday's election by a total majority of 673 votes.

On the first count the vote was:

Lang, Liberal	1774
Blanchard, Cons.	1150
Bullivant, Ind.	935

In the second count Bullivant was eliminated and his second choices were allotted as follows:

Lang	272
Blanchard	215

These added to the first choice made the final total:

Lang	2046
Blanchard	1365

Majority for Lang 681.

In Redcliff the result of the poll was:

Lang	191
Lang	136
Bullivant	28

Spotted Ballots 21.

Total 376.

There were 21 spoiled ballots here. Of these 14 were marked with an X instead of 1 for Blanchard, 4 for Lang and 3 for Bullivant.

The total vote in the election in 1928 was: Lang 1604; Hendricks 1109. Majority for Lang 495.

Bricks Tie Town In League Series

Defeat Callies Last Wednesday Evening 1-0.

In a league game last Wednesday evening the Brick & Coal defeated the Callies 1 goal to 0.

During the first 15 minutes of the game the Bricks had considerably the best of the play and scored the only goal of the game in the first five minutes.

Few minutes later Bill Willis met with an accident and retired from the game. With the Bricks now playing one man short the play from then on was more evenly divided. However the Bricks defend kept the visitors well in hand and allowed no scoring.

This win for the Bricks places them even with the Town team in the league series. These two teams play here to-night, Thursday.

U. F. A. Gets Only 40 Per Cent of Vote

And Yet Elect 60 Per Cent of Members.

Results of recent provincial elections so far compiled show that the United Farmers by casting 38 per cent of the total vote of the province were successful in electing 40 members or 60 per cent of the representatives to the legislature. 72,062 votes were cast for U. F. A. candidates and 111,660 votes cast for candidates opposed to the U. F. A. members elect. It took only an average of 1800 votes to elect a U. F. A. member, 4100 to elect a Liberal and 4216 to elect a Conservative. And still we are supposed to have representation by population in this country.

R. Gallacher is in town this week soliciting membership in the Canadian Geographic Society. He reports a successful visit.

Compiling Voters List For Dominion Election

Names Must Be Put on Before July 3rd.

Voters' lists for the Dominion election which takes place on July 28th, are now being compiled. Wilfred Campeau has been appointed enumerator for Redcliff and is at present engaged adding the names of qualified voters of the lists. A copy of the list as compiled so far may be seen either in the post office or in the store of P. Campeau & Son.

All British Subjects of the full age of 21 years who have been a year in Canada and a month in the Constituency are eligible to be on the list and have a vote. The list will be closed on July 3rd. See Mr. Campeau and make sure your name is on.

Baker and Smith Are Both Elected

U. F. A. Members for Cypress and Ennema Returned.

Hon. Perrin Baker, Minister of Education in the Brownlee government, was successful in winning the election in Cypress constituency, defeating W. Black of Medicine Hat, his Liberal opponent. When the first return came in it looked as though Mr. Baker would have a close run but the final returns gave him a comfortable majority of over 360.

In Ennema constituency W. C. Smith, who has been the member for the past nine years, defeated Mr. Mantz, his independent opponent, by almost two to one.

Prof. Murray Goes To Olds Ag. College

Has B. A. Agricultural Agent at Medicine Hat.

Prof. Jas. Murray, who has been government agricultural agent at Medicine Hat for the past few years, has been appointed principal of the Olds School of Agriculture to succeed F. S. Graduale, who resigned and was elected U. F. A. member for Olds. Mr. Murray takes over his new duties at once.

Score at the Finish of the Game was 3 goals to 1.

Redcliff Town football team had another win Tuesday evening when they defeated the Legion 3 to 1 in the Five Roses cup.

In the first half, with the wind and sun in their favor, the Legion had much the best of the play, but owing to the Stonewall defence of the visitors no goals were scored.

In the second half Redcliff started off with a bang and did not let up until they had scored three goals in rapid succession all three being scored inside of fifteen minutes. With this lead the Cliffers appeared to lose interest and for the next fifteen minutes the Legion forwards made several nice attacks but located the net only once.

The three goals scored by Redcliff were hum dingers, and fans were unanimous in the opinion that the first one, scored by Ernie Podesta, by a Cannon ball shot from a nice angle on the wing, was the most spectacular of the season. The other two were scored by Gibson and Henderson off perfectly placed corner kicks from E. Podesta and D. Phillips.

This win places the Town team at the top in the five roses with one more postponed game to be played.

Miss Lillian Mumford McDermott, daughter of Mr. and Mrs. P. McDermott of this town was married in Los Angeles on May 24th to Kyle Head, a member of the Company with which Miss McDermott has been associated for the past few years.

Mrs. Creer and her mother, Mrs. Allan of Medicine Hat, have been visiting Mrs. W. J. Fairbairn for the past week. Last Monday Mrs. Fairbairn entertained at Medicine Hat and Redcliff

Everything Ready for Redcliffs Big Stampede

Race Horses and Broncho Busters Coming.

Now that the provincial elections have passed into history, let us all turn our attention to Redcliff's big annual Stampede which will be held next Tuesday Dominion Day.

Everything points to a big day's program. Good race horses are coming from all quarters and arrangements have been made for the required number of bucking horses and wild steer riders for them from far and near have also signified their intention of being here for the occasion.

The only things that can possibly prevent the day from being the biggest success yet are the weather and the crowd.

Nobody can control the weather but the public has the big say in the crowd. Let all turn out and give the committee the encouragement necessary to make the event a real success and retain their enthusiasm for another year.

Besides horse races, broncho and steer riding, the program makes provision for Athletic Sports for school children. Bring the youngsters along and let them take part in the races.

Score at the Finish of the Game was 3 goals to 1.

Redcliff Town football team had another win Tuesday evening when they defeated the Legion 3 to 1 in the Five Roses cup.

In the first half, with the wind and sun in their favor, the Legion had much the best of the play, but owing to the Stonewall defence of the visitors no goals were scored.

In the second half Redcliff started off with a bang and did not let up until they had scored three goals in rapid succession all three being scored inside of fifteen minutes. With this lead the Cliffers appeared to lose interest and for the next fifteen minutes the Legion forwards made several nice attacks but located the net only once.

The three goals scored by Redcliff were hum dingers, and fans were unanimous in the opinion that the first one, scored by Ernie Podesta, by a Cannon ball shot from a nice angle on the wing, was the most spectacular of the season. Redcliff Dogs Take Prizes at Dog Show

Make Good Showing at Medicine Hat Last Week.

Redcliff dogs made a good showing at the dog show in Medicine Hat last week. The following is a list of the prize winners:

Cliff Klapper—1st in puppy class; 1st in novice; Special for best wire bitch in show; Cup for best dog in show any breed; also winners.

Cliff Seven Spot—1st in puppy class; 2nd in novice; Shield for best male dog owned and bred in the district. Both the above were bred by Mr. Champ and both were out of the same litter.

Mayor Worts' bitch, Suix of Goldmond won 1st. novice and 1st for open in the German Shepherd class; also winners, best of breed, and special and cup for the best novice, best bitch in show. Special for best German Shepherd from Redcliff.

A McKenzie with "Carly" won 1st. novice, winners and best of breed, and special for best male in Irish water spaniel class.

W. Campeau with "Sport Bette" won 1st. winners and special for best bitch in Irish water spaniel class.

Mrs. Baddaue with "Tricks" in the Spitz class won 1st in the open class; winners and best of breed.

Henry Keal with "Prince Von Keal" in the German Shepherd won 1st puppy; 1st novice; 3rd in Canadian bred class; and special for best novice male.

Carlo Oksa with "Jackie Von Oksa" won 3rd. in puppy class; 3rd. in novice class.

Mrs. T. Bailey with "June Von Rose" won 1st puppy; 2nd novice and the cup for the best dog or bitch from Redcliff.

Sam McClear with "Irene Von Joette" won 3rd. for puppy bitch and 3rd novice bitch.

The above four were bred by G. H. Worts from "Suix of Goldmond."

A. J. Learmonth with "Athara King Lear" won 3rd. in open Cattle class.

There were 216 dogs at the show and 15 of them were from Redcliff, all of which won prizes of some kind.

Solloway and Mills

Draw Prison Terms

Are Also Fined \$250,000 which They Paid.

The Solloway, Mills case which has been in progress for the past two weeks was brought to a close last Monday. Both were on trial charged with conspiracy to defraud the public. Both were found guilty.

Solloway was sentenced to 4 months hard labor at Lethbridge and fined \$250,000. Mills got one month imprisonment and was fined \$250,000. In default of payment of the fine an additional penalty of 23 months was imposed.

The fines were paid and accused were allowed out on bail pending the hearing of an appeal.

Could Stamp Out Typhoid Fever

No Reason Why Anyone Should Suffer From This Disease

One of the saddest, stupidest, and most unnecessary wastages of human life to be found in all of Canada, is the annual toll taken by typhoid fever. Suppose that you picked up your newspaper one day, and read that a human fiend was at work in the community shooting down innocent people in the streets. Suppose that every day this hideous monster killed three people. And suppose that he kept it up for a year, until he had killed over a thousand people.

Wouldn't the whole of Canada be in a frenzy of excitement? Wouldn't the whole country spend millions of dollars if necessary to catch the slayer? Of course it would. And eventually the murderer would be caught.

You do not believe, of course, that such a situation could exist. Not only could it exist, but it actually does. There is a fiend who is murdering Canadians at the rate of three a day. He is a silent fiend. He kills without noise, from Britain, from France, from Ireland, and we are almost indifferent to him. His name is typhoid fever, and we could kill him if we would take the trouble. Science has given us the means to absolutely wipe typhoid fever from the country. That because it has always been with us, we have not yet realized that a little effort on our part would give us a future generations free from it.

So easily may typhoid be prevented, that a public health officer has said: "For every death from typhoid fever there should be one hanging." There are certain definite, and practical precautions which the public should take, and should take to protect itself against typhoid fever. One of these is inoculation with typhoid vaccine, about which I want to tell you today. Inoculation is a very simple process, but very beneficial and it is important that everyone should know as much as possible about it, so that they can appreciate its advantages. Gradually the world has become accustomed to this new discovery was a great boon to mankind. Nowadays inoculation is an accepted practice in the British and German armies. All medical men urge it, whenever there is the slightest danger of typhoid fever being contracted.

Right here, it may be mentioned that those of us who live in large cities do not usually run much danger of typhoid fever. The reason for that is, that the large cities, with their efficient medical health departments, chlorinate their water supply and pasteurize their milk. And in water and milk, typhoid fever is usually carried. It is thus living in rural Canada, where the typhoid death rate is by far the highest, that the inoculation against typhoid is such a boon.

But for city people there are two rules which must be observed when you are going to run time-garages of typhoid fever some time in your life. The first is to drink only water from anything else, unless you are absolutely certain that its source is unquestionable. The second is to never eat without washing your hands.

If you cannot observe these rules, or even if you can, and there is any question in your mind as to your safety from this disease, then you should take the additional precaution of being inoculated.

The poor victim is usually very ill. Whether or not he dies depends on whether or not the defending blood cells can turn out quickly enough to overcome the quickly-multiplying typhoid germs.

Should the patient recover, then he has developed in himself something which has never had before. Whereas his white blood cells, before his illness, were equipped to fight with ordinary germs, now they have learned to defeat typhoid germs. If they hadn't, the patient would never have lived.

That this method is that he will probably not get typhoid fever again, or if he does get it, it will never be

more than a very mild form of the disease.

This gave scientists a brilliant idea: if the living germs will put the defending cell army to work in this way, why don't dead germs?

The experiment was tried. The scientific pill millions of the living typhoid germs in broth. Then they sterilized the broth by boiling it, so as to kill all the germs. They then injected these killed germs into animals. A little resistance and feverishness was produced and lasted a day or so, but thereafter there were no ill effects. After the process had been repeated once or twice, it was found that millions of the dead germs could be injected into animals and have no effect whatever.

When it came to work, the cell army had been put to work just the same, but because the germs were dead, and could not multiply, the cell army easily won the battle. Yet the cell army, as a result of the struggle with the germs was equipped to meet an invading host of germs.

After hundreds of tests had been made on animals, the principle was applied to man with equal success.

Of course it is impossible to introduce a foreign substance into the system without some reaction. The reaction most that happens as a rule however, is what can be best described as an "out-of-north" feeling. It lasts from twenty-four to forty-eight hours after the injection. Some people do not feel the slightest inconvenience from it.

When the needle goes into the skin, it is hardly felt. The amount of the injection is about eight drops for the first, and about six for the second. The first one contains about 500 millions, and the second about 1,000 millions of the dead germs. The injections are usually about ten days apart.

The vaccine to this day, is made in exactly the same way as it was to the day of those original experiments. It is made by simply taking, about, except of course, that there is more modern equipment for doing it. The typhoid germs are grown in pure broth, in an incubator. They are killed by heat and counted—actually counted—although they are so small that it takes a very high power microscope to find them. The purity of the injection is ascertained, it is made doubly sure that all the germs are dead, and then it is ready for inoculation.

Of course there is talk, in connection with inoculation for typhoid just as there is in connection with vaccination for mumps, or personal liberty, and getting poison into their system. Typhoid inoculation means injecting dead bacilli in the form of a vaccine, and it is one of the means for guarding against a very deadly, painful and dangerous poison.

Persistence Was Rewarded

But Scenario Writer Did Not Think

A woman who had made a number of unsuccessful attempts to carry out a scenario she had written conceived the idea of changing her name and submitting it as an unreciprocated manuscript to one of the producers. Five times, each time under a different name, it was returned with the same stereotyped polite note. Undismayed, she sent it out again and was told to get a reply saying that the play could be used. Her happiness suddenly vanished, however, when the real title of the play was revealed. It was "The Girl Who Was Wiped Out by the Flood."

What Revolution Did

A man somewhat under the influence of good-fellowship attempted to pass through the revolving door of a restaurant. Each time he entered he made the complete round and found himself in the street again. After several unsuccessful attempts he sat down on the pavement to work things out.

A moment later a young man walked rapidly up the street and went in. The door swung round and a young woman came out. "What gets me," he remarked, "is how he changed his clothes."

Where Examinations Fail

If we have to have examinations it would be much more logical and reasonable to examine a man to find out what he does not know, than to confine the quiz to the things he is supposed to have stored away for some month. It is the things that a man knows outside the curriculum that usually make for success in life, and no examination will discover his attainments in this respect.

And then there are those who are trying to live a swallow-tail life on a tuxedo income.

The native home of wheat is Palestine.

How News Breaks

Carelessly Dropped Words Are Eagerly Snapped Up By Reporters

The decision to arrest Gandhi was announced in two or three London papers before the event actually took place, and it is related that Premier Ramsey MacDonald, furious with regard to the premature exposure, instructed Scotland Yard to make investigation.

Two editors refused to disclose the source of the information, but under some grumbling a lobby reporter admitted that a member of the cabinet had made the statement with absolute hearing. The minister says that he does not recall making any such utterance while in the lobby, feeling, no doubt, that the usual excuse of erroneously reporting what he said would not hold good in this instance.

Two things stand out in this matter. The first is that when a private publicity might do damage it is always better to take the responsible heads of papers into full confidence, and the second is that wherever men are gathered together in secret conference, at least one, and probably more, will sooner or later disclose what occurred.

Names Have Changed

Years Ago There Were Three Kinds Of Mallard Ducks

Widely known as smoking duck fifty years ago for the reason that its call was thought to resemble the sound of a smoker puffing on his pipe, in the "Revolution" or "Eighteen" there were three kinds of mallards—greenheads, grey mallards, and black mallards. The grey mallard was the female mallard, and the black mallard was the black duck. Green heads were commonly believed at that time to be a separate species. The name "black mallard" has lived in many areas and the black duck today is known by that title more frequently than by its rightful name.

Lake Has Two Outlets

Interesting Feature About Body Of Water In Northern Saskatchewan

An interesting feature about Watson Lake, shown on the map as covering about 3,000 square miles of "Pond du lac River Basin" in northern Saskatchewan, published by the Topographical Survey, Department of the Interior, is that it has two large outlets. These are Pond du lac River, draining to Lake Athabasca, and Ockean River, flowing to Alexander Lake and through Reindeer and Churchill Rivers to Hudson Bay.

Information Wanted

It was the first real snowstorm of the year and the teacher felt it her duty to warn the pupils before she dismissed them. "Boys and girls should be very careful to avoid slips at this time of the year," she began solemnly. "I had a dreadful little pupil only seven years old. One day he went out in the snow with his sled and fell on his back. Presumably he set in and in three days he was dead." The schoolroom was quiet. Then a youngster in the back row asked: "Where's his sled?"

Pedigree Bulls for West

The above layout shows two animals which formed part of the shipment of Old Country cattle sent out to Western Canada by Canadian Pacific freight, by the Prince of Wales, to augment the stock of the Pelly ranch. The upper animal shown, "Craggion Shylcock," a dark roan yearling to be used for exhibition purposes, and the lower picture, "Craggion Gladiator," a two-year old roan to be kept in the herd.

INVESTIGATING BRITISH TRADE

Wilfred Hill, president of the County Chemical Co., Birmingham, England, who is investigating British trade with Canada. Mr. Hill, one of the charter members of the Birmingham Chamber of Commerce, is recognized as an authority of free trade.

A Distinguished Scientist

Joseph Priestley Was Making Astonishing Discoveries Over Century Ago

A century and a half ago Joseph Priestley was laying the foundation of chemistry, revealing to an astonished world his discoveries—more startling, in his way of knowledge, than anything Professor Einstein has sprung upon us—there were different kinds of "air," leading step by step, to our knowledge of gases. He was a theologian, too, was a minister, indeed, when he made his fortunate match with an iron-master's eighteen-year-old daughter. He had written on grammar. There was precious little in the way of knowledge, 180 years ago, that his mighty brain had not mastered. Mrs. Priestley once sent her father, learned husband shopping, with a huge market-basket on his arm. Only once, he who knew that men sayohed alive about unitarians and earthquakes and atmospheres, made such a mess of it that he never sent him again.

Making the Best Of It

Success Lies In Doing the Ordinary Things Well

Doing commonplace things well may at times seem rather humdrum business, while we are engaged at them, but there is nothing in all the world that tells more significantly when the whole record of life's enterprises and achievements is counted up. And to fail in the everyday work of life is the very worst failure we can make.

The man who finds fault with life because it does not give him a place in the front row has not yet come to understand where life's finest opportunities lie. The man who is doing his ordinary things has quite as many of them as any one else, if he would only see it.

"Fancy Nature making those wonderful mountains," said mother. But "Tummy only smiled." "Well, I could make 'em," said he, "if I had enough dirt."

The Inferiority Complex

Is Being Afraid You Will Always Do the Wrong Thing

An inferiority complex is the sort of thing that makes you turn off the radio to keep from waking the baby next door, while it prevents you from complaining of the baby next door waking you by crying in the night because babies have a right to cry.

It is the sort of thing that makes you rush to return a book you have borrowed, while it makes you hesitate to ask for the book that some body has borrowed from you.

It is the sort of thing that leads you to spank your dog for barking at the neighbor's cat, but prevents you from driving the neighbor's chickens from your flower garden on the ground that your neighbor may be offended and, after all, it is impossible for chickens to know that they are trespassing.

An inferiority complex is what prevents you from asking for a job which you think you are qualified to do, because it does not seem quite proper to seek it, and, at the same time, leads you to admire the man who manages to get the job.

It is what keeps you from inviting a neighbor to dinner at the hotel on the ground that it is impolite, while accepting such late invitation is based on the assumption that no discourtesy is meant.

It is an inferiority complex that prevents you from calling people on the telephone after 10 o'clock at night because they are likely to have gone to bed, but which permits you to tell yourself when you are awakened by the telephone for keeping you from feeling hurt when you are left out of a party because it is impossible to call everybody, but when you give a party yourself feeling obliged to ask everybody for fear something will be hurt by being left out.

In short, an inferiority complex leads to the belief, that pretty much everything you do to other people may offend them, while you have no reasonable grounds for complaint over any of the things they do to you.

Taking No Chances

Squad Leader Believed Firmly In "Safety First" Maxim

The dry squad was about to raid a notorious den of pickpockets and bootleggers. The dive had been the scene of many a shooting, and the squad leader was addressing his squad to bolster their courage. "Remember, men," he thundered, "about to raid the worst den in the underworld. This takes courage, and these run-runners are armed to the teeth. Don't give up your last shot in first den, and only then, will it be time to run."

He paused for dramatic effect, and started moving away. "As I am a little slow on my feet," he noticed back over his shoulder, "I'm starting right now."

No Reason For Pessimism

Canada In Better Shape Than Last Year, Says C. E. Harvey

C. E. Harvey, retiring president of the Canadian Manufacturers' Association, Prairie Division, addressing the annual meeting in Winnipeg recently, stated that Canada has no reason for pessimism. Business conditions are considerably better than they were a year ago, he said. The manufacturing industry of Manitoba has grown with astonishing rapidity and the value of its products in 1928 exceeded \$240,000,000, an increase over 1928.

Choosing Easiest Way

An student performing in a northern town, put a woman into a box from which there was no apparent outlet, and about the lid. When he opened it again there was nothing inside but a couple of rabbits.

After the performance a Scotland approach and asked a question. "Why, yes," answered the illusionist. "But are you anxious to get rid of your wife?"

"Well," answered the Scot, "it's no use such that, but we would not no less proline him two rabbits for his birthday."

Anniversary Of Postage Stamp

We have passed the sixtieth anniversary of the first use of the postage stamp. It was in Britain that this popular innovation was adopted, and the "Black Penny Queen's Head" was the first label. One of these is now very valuable. But there are stamps worth thousands of dollars each. One was bought the other day for \$70. It was issued by a postmaster in the United States in 1847.

Movement Started In Canada

First Rural Women's Club Was Formed At Stony Creek, Ontario

Over Thirty Years Ago

The International Conference of Rural Women to be held in Vienna, Austria, May 28th to 30th, is of particular interest to the women of Canada. The first rural women's club to be formed anywhere in the world was at Stony Creek, Ontario, over 30 years ago. This club was organized for the purpose of improving the status of home life in the rural districts. Additional clubs were soon formed in other parts of Ontario. The neighboring provinces of Canada and other countries learned of the movement started at Stony Creek, and visitors came to the districts where rural women's clubs or institutes were operating, to observe.

The first convention of representatives of these institutes in Canada was held at the Agricultural College, Guelph, Ontario, in 1896, in small hall on the top floor of the MacDonald Institute building at the College. There are now some twenty rural women's institutes in Ontario, and a convention of the representatives of one of the five districts in the province recently held a large hall to accommodate the delegates.

Women in the rural districts throughout the world are being led under different names, but all are the result of the first organization at Stony Creek. The movement was started in the British Isles, by Canadian women. Mrs. Alfred Watt, during the Great War, and her now well known daughter, Mrs. M. Watt, in 1929. At that convention there were representatives from Canada, the British Isles, the United States, Australia, New Zealand, Germany, Norway, Czechoslovakia, and India, and the chairman was Mrs. Watt, who is also a prominent worker in the forthcoming convention in Vienna.

Declared Officially Dead

Woman Very Much Alive But Clerk Would Not Cancel Certificate

Officially dead and possessed of a death certificate but very much alive, in fact, is Juana Gonzalez, a 70-year-old widow resident of Pueblo Viejo, Porto Rico's first town, founded by Ponce de Leon. His name means "Old Town" or "Old People."

The question of how to cancel the certificate has been referred to the Attorney-General, with the possibility that a court order, or even legislation, may be necessary.

Two grandsons of Juana Gonzalez, believing her dead, took all legal steps and made other preparations for burial. The purchase of a coffin and obtaining of a burial permit required more than five hours. Remember, they found their grandmother was alive and the death certificate was useless.

A physician's statement convinced the Guaynabo civil registry clerk that Juana Gonzalez was not dead, but he could find no law preventing the cancellation of the registry entry.

More Damage The Better

Death-watched beetles are to be encouraged to do all the damage they can in a house that is to be "somewhere in Buckinghamshire," England. These beetles, whose kin devoured the old oak at Westminster Hall, are to be the sole occupants, while scientists from several research institutes and government centres will look on and increase their knowledge of the pests that cause such damage to Britain's buildings.

Population Of United States

Estimates of the population of the United States give the total as 122,000,000. The birth and death rates are becoming balanced, and if the present restricted rate of immigration continues, the population is expected to become stationary at about 120,000,000 in 1940. The population of the British Isles is about 47,150,000.

"Where were you when the at caused first shot?" "About three yards off." "And when he fired the second shot?" "A thousand yards off." — Pages Gales, Treadwell

WORLD HAPPENINGS BRIEFLY TOLD

Lethbridge voted 705 to 47 to spend \$20,000 to improve its air harbor and provide hangar, aeroplane sheds, etc., so that the city may be made a port of call on the air mail route.

The Prince of Wales soon will qualify for his air pilot's license. He handled the controls during the 200-mile air trips he took, making the landings.

Frankfurter Zeitung says that Germany has paid into the Bank of International Settlements a deposit of 100,000,000 marks, which she is obliged to do under the terms of the Hague agreement.

For the first time in history Scotland Yard has enrolled eight women detectives. Known as the "mystery eight," the women were chosen for their looks, education and knowledge of police work.

Any Johnson, attractive British girl, who became a national heroine on the recent completion of her flight to Australia, was awarded the honor of Commander of the British Empire in the King's birthday honors list.

The Chrysler building, in New York, tallest structure in the world, was opened formally May 28. Its furnished, rustless steel spire scrapes the clouds 1,000 feet above 42nd street and Lexington Avenue, 46 feet higher than the Eiffel Tower.

Treaty for the protection of the salmon fishery, in the Fraser River and waters adjoining British Columbia, and the State of Washington, was signed at Washington by the Canadian Minister Hon. Vincent Massey, and the Secretary of State, Henry L. Stimson.

Taking to his parachute after being thrown from his aeroplane while making over Kingston, Ontario, Lester, M. F. Slaght, a member of an 18-plane squadron from Detroit, traveling to Kingston, Ontario, had a miraculous escape from death. The machine was a total wreck.

Ensures Quality and Length

Canadian Inspectors Keep Careful Check On Binder Twine

One of the perennial difficulties of the grain grower at harvest time comes from binder twine. The Seed Branch of the Dominion Department of Agriculture, through its inspectors, keeps a careful check not only on the quality of binder twine made in Canadian factories and also brought in from other countries, but they also take particular care to ensure that the full length of the twine is in the ball. Under the Inspection and Sales Act every ball of binder twine sold in Canada must bear a label showing the name of the maker and the number of feet per pound in the ball of twine. The usual lengths are 500, 600, 650 and 660 feet per pound, the two longer lengths being the more popular in Canada. Systematic inspection secures uniformity of the regulations are infrequent, and also ensures that quality in the product, which gives confidence to the farmer using it.

People in Germany stay nearly 2,000,000 American messages last year.

Railways Aided Fruit Growing Have Made Commercial Orcharding Possible in Ontario

In Ontario, where the commercial production of all descriptions of fruit capable of cultivation in Canada has reached its highest development, apples have been grown from the middle of the eighteenth century; but commercial orcharding has developed only within the past 50 or 60 years, and was only made possible by the building of the railways permitted them and fruit 40, to be transported quickly. The great winter apple districts include the border of Lake Ontario extending back 80 miles and more to the shore of the lakes of Lake Huron and Georgian bay, several miles in depth, and the southwestern part of the province.

Producing Better Bacon Live Hog Grading Policy Has Excellent Results

Canada's Live Hog Grading Policy, supervised by the Meat Inspection Service of the Dominion Live Stock Branch, has resulted in the production of increasing quantities of select bacon loaves. Red and dairy hogs, products and finished on the small hams which make for firm high-quality product, these hogs are marketed by government inspectors packing plants under ideal conditions. The product is mild and tender, and it is to the retailer in the form for which the housewife shows a growing appreciation—better bacon.

(By Anabelle Worthington).

The transfer of the Natural Resources places the Province in a position to develop the resources of other Provinces of Confederation. On July 15th, we shall have reached a milestone in the history of the Province of Ontario. It is fitting therefore, that this historic occasion should be officially recognized with appropriate ceremonies.

The completion of the railway line to Manitoba's inland sea, this year, is also significant. It was through the Hudson Strait, the Hudson Bay, and the St. Lawrence River, that the first white people journeyed to the land of promise, over a hundred years ago. For many years the Hudson Bay and the Red River. With the opening up of transportation by rail to Port Churchill, there will be established an artery of trade tying that area, one which was so vital to the very existence of the people of the great north-west.

The opening up of the vast natural resources of the Province is a great thing, and this year will see the first time in the history of the Province that the early prospectors and explorers have been referred to here. Within the last few years the faith and hope of the early prospectors and explorers has been rewarded, and this year will see the first time in the history of the Province that the early prospectors and explorers have been referred to here. Within the last few years the faith and hope of the early prospectors and explorers has been rewarded, and this year will see the first time in the history of the Province that the early prospectors and explorers have been referred to here.

Style No. 2948 makes an excellent school frock for the girl who knows smart clothes. It is very inexpensive too. In the 8-year size 1 1/2 yards of 40-inch material is sufficient to copy it exactly. It is designed in steps 8, 10, 12 and 14 years.

Brown and white checked gingham with the one-sided border which is merely an over-bow caught in the folds of the collar and the dark plain brown piece is strikingly effective.

Light green cotton plaid with beige and pinkish plaid in yellow is very attractive.

Orchid champagne, pink, blushing, wood chills in yellow and brown tones. French blue plaid with white polka-dots, and dark and white printed plaid are effective combinations.

It is just about perfect in tomato red dress of chine with the little beige jacket of navy blue gingham. Printed red de chine in Royal blue tones with tan is very popular.

Navy blue wool crepe is very fashionable for travel or school. Pattern prices 20 cents. Be sure to note the pattern. Address: Pattern Department.

HOW CANADIAN LAMBS CAN BE PRODUCED

These lambs, which won the carlot prize at the last Royal Fair, show what can be done by good breeding, feeding and proper preparation for the market, by doing just the opposite. They are excellent for uniform conformation and right weight.

Manitoba's Diamond Jubilee On July Fifteenth, Province Will Celebrate Sixty Years Of Growth and Progress

The following speech by Premier John Bracken, President of the Provincial Committee, was broadcast on May Thirtieth:

I have been asked by the Diamond Jubilee Committee to make a statement concerning the celebration this year of Manitoba's Diamond Jubilee.

In the 320 years since the first white man set eyes upon the northern part of what is now Manitoba, many milestones have marked the progress of the people of all that part of Canada lying west of Manitoba's eastern boundary line.

For my purpose tonight, let me direct your attention to four milestones which have still a long way to go, will credit to the year 1930. First, the Sixteenth Anniversary of the birth of the Province on July 15th; second, the transfer of Manitoba's Natural Resources, on July 15th, from Federal to Provincial control, after a controversy extending over 60 years; third, the recognition of Manitoba as a Maritime Province, as a result of the completion of the Hudson Bay Railway line and plans for the construction of a harbor at Port Churchill; and fourth, the opening up on a commercial scale of the rich mining territory in the north, following the completion of railway lines into the Pin and the north.

On July 15th, of this year, sixty years will have come and gone since the mile post of 1870. It has been a wonderful sixty years from whatever angle it is viewed—sixty years of growth and progress in agriculture, in education, in colonization, in industry and in transportation, in fact, in all activities of the life of the Province.

The transfer of the Natural Resources places the Province in a position to develop the resources of other Provinces of Confederation. On July 15th, we shall have reached a milestone in the history of the Province of Ontario. It is fitting therefore, that this historic occasion should be officially recognized with appropriate ceremonies.

The completion of the railway line to Manitoba's inland sea, this year, is also significant. It was through the Hudson Strait, the Hudson Bay, and the St. Lawrence River, that the first white people journeyed to the land of promise, over a hundred years ago. For many years the Hudson Bay and the Red River. With the opening up of transportation by rail to Port Churchill, there will be established an artery of trade tying that area, one which was so vital to the very existence of the people of the great north-west.

organized from the early history of local communities and since the early days of settlement. The Government is prepared to encourage such local efforts by assisting in financing the preparation of reliable histories of these communities and these early pioneers.

In agriculture it is a far cry from harvesting with knives, scythes, and reapers, and more recently the combine harvester. Today, yet the brief period of 90 years comprises the whole time between these two extremes.

Much history has been written since the time when 116,000 square miles of land were sold for 18 shillings, and a quarter century ago; and the surrender of the Hudson Bay land for \$1,000,000 sixty years ago; and much has been accomplished since the first export of 867 bushels of wheat; yet that was only 54 years ago.

There has been a long and tedious campaign in our political development from the birth as a Province without lands subject to the crown to the present day. The first, when the unalienated lands were in the past, of four and a half million dollars.

The development of transportation here reads like a fairy tale. Three hundred and twenty years ago Hudson Bay came with a sailing ship via Hudson Bay. 192 years ago La Verendrye came by canoe over the water route from Montreal; 130 years ago Red River came across the prairie by a means of transportation; and 70 years ago railways of commerce and of war were first made their way to the west.

Within the memory of the last generation the automobile has come, and now aerial transportation quickly places within our reach even most remote districts of the province.

The history of the next 60 years will not be a greater progress than those of the last 60 years. It will not be an interesting fact of Winnipeg history that, during the last 5 years we have practically recovered four fifths of this Province; that during the same period we have opened up Northern Manitoba by railway development; and by aerial transportation that the same 5 years will be looked upon as a period of the greatest expansion in the history of the Province.

Steam at high pressure has been successfully used to combat fires in oil wells.

It is human nature to believe that those who disagree with us are in the wrong.

Wool Market Wanted

Canadian Producers Would Like To Sell At Home

Canadian wool growers, who produce slightly over 21,000,000 pounds of wool annually, are not as well situated as to markets as are the growers of other live stock products. In spite of the fact that Canadian wool is the equal of that grown anywhere, much of our product must find a market in other countries, while goods containing virgin wool and goods into which has been woven a large percentage of shoddy are purchased and used freely by Canadian people.

It is estimated that 70,000,000 pounds of wool are required annually to meet the needs of the Canadian people. However, we are forced to seek a market in United States and Great Britain for our raw wool, while we freely admit wool and yarns from other countries.

There has grown up the custom in this land of favoring the imported product, believing that it has some virtue not possessed by Canadian-made goods. This custom, coating not only wool growers and fabric makers, but many other manufacturers a great deal of money.

No duty has been collected on wool coming into Canada for many years. For the past few weeks, a tariff of 10 per cent has been levied. As a result of this many mills have ceased to spin and that means that the wool which was formerly in Canada, much of the wool used has been grown on the backs of sheep in countries other than Canada. This is a problem that requires the earnest attention of sheep raisers and farmers generally, for the sheep industry is a service to agriculture, over and above that represented by 21,000,000 pounds of wool at 10 cents per pound—Farmer's Advocate.

Advice For Livestock Producers Should Exercise Caution With Respect To Movement To Slaughter

The Dominion Live Stock Branch continues its advice to the producer to exercise the greatest caution with respect to the movement of livestock to slaughter. The reasons for this are: Consumer purchasing power shows a decline, the expert market is comparatively narrow, demand for meat is decreasing, and the cost of live stock is high. At the present time 12 per cent more beef is in cold storage than for the same time last year, the stock of fresh frozen beef is about 26 per cent heavier, and 10 per cent heavier, and lamb and mutton in cold storage shows an increase of 84 per cent over the corresponding period last year.

When this country was first discovered by a howling wilderness and since then it has progressed to be a hiving civilization.

The Jerusalem artichoke was one of the vegetables grown by the Indians.

Finland will have a fleet of eight gunboats to stop liquor smuggling.

May Reclaim the Sahara

French Hopes To Make Desert Blossom As the Nile

The Sahara desert will be made to blossom as the rose one of these days, J. H. Richard believed, and then France will be one of the great agricultural nations of the world.

Richard, former French Minister of Agriculture, has arrived in New York to study machinery used in reclaiming American deserts.

He hopes some means will be perfected for using radio to detect underground strata of water. Several geologists, he said, agree that vast layers of water are beneath the Sahara and at 23 miles, in South Africa, underground water has been pumped to the surface and used to grow rice bushes ten feet high.

Proved It For Himself

Victor Says Legend About London Bridge Is True

For three consecutive weeks, a reporter in London, England, has amused himself by testing the truth of the old saying that no one can cross London Bridge without seeing a white horse. "Morning and evening, daily I have crossed the bridge," he said, "and on each occasion I have seen at least one white horse—except, to be honest, when I have forgotten to look." The saying, stated, of course, before transport became mechanized, but it is curious that its application should yet survive. The direction of London Bridge traffic is still horse-driven.

Can Control Wireless Station

In An Emergency The League Of Nations Could Broadcast To World

The League of Nations and the Swiss Government have reached an agreement whereby the League, in times of emergency, could have complete control of a wireless station for communication to all parts of the world.

Sir Eric Drummond, in behalf of the League, and Joseph Moett, for Switzerland, signed the convention providing for construction of this station, which in normal times will be under the direction of the Radio Swiss Company.

Surgery In Motion Pictures

Motion pictures are being introduced into the University of Berlin, Germany, to teach surgery. During an operation in the cinema, cameras focused on the operating table makes a film record of every step in the surgeon's work. Later the film is shown in the classroom and the operation explained.

The principal street of a town is now called the Main street.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

Light and flexible glass substitute is perfect for use in all climates. It will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the ultra-violet rays which do not penetrate ordinary glass.

USE WINDOLITE IN BROODER HOUSES LAYING PENNS DAIRY BARN SUNROOMS ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

CHAPTER XV.—Continued.

"Oh, no, she doesn't!" contradicted Grandma, "not if she finds the right man, anyway. School teachings all very well for a while; but I guess the girls are just the same inside as they were in my day, except maybe they're more sensible. A girl wants her own man and her own home and her own babies, whether she wears her skirts to her knees or tralling in the dust as they did when I was your age. I saw a letter in the Boston paper protesting about 'this leg show', as the women called it. I made me sort of mad. I guess she was over seventy, or else terribly behind the times. I'm too old to make changes myself; but it would be a dull world if nobody made 'em; and for my part I can't see what's wrong with a pair of legs. Even Mrs. Merry's had her best dress shortened, though being the minister's wife I expect some folks' criticism here. If you're not too tired, child, I think you'd better make something good for supper. The doctor's been scurrying 'round all day, and is liable to have an appetite. Here he comes now!"

CHAPTER XVI.

On a bright afternoon in late October, Charman, who had stayed after school to correct some papers, was just starting on his homeward walk when a familiar car approached and drew up beside her.

"Here," questioned Jim shortly, "you don't seem to be going my way," she answered.

"What if I? I'll have you back in time to get your supper, and a breath of air will do you good. Hop in!"

Charman obeyed.

"I hope Grandma won't think I'm lost or kidnapped," she said uneasily; but in a moment Jim saw that she had relaxed, and guessed that his timely invitation was a relief.

"Here!" he asked, as they moved away from the old brick schoolhouse and headed toward Eastboro.

"A little," the girl admitted, "it's been a trying day. I expect some days come to all school-ama's, and I'm no exception."

"What was your special brand of trouble this time?"

Charman looked up with a quick smile.

"Deacon Purdie."

"That old mad turtle! What business did he have with you?"

"Have you forgotten Jim? He was in the doing father of six!" smiled Charman. "To make a long story short, Jim, Lucie's idea, who's a smart aleck if there ever was one, was too impatient yesterday to be endured. I sent him home

room; and Grandma likes to talk with him."

"A fine chance she has when you and he are watching the no-moon rise from Wade's Hill," Jim countered with good-natured sarcasm.

"Whoever on this earth told you I climbed Wade's Hill with him?"

Charman was so astonished that Jim smiled as he replied: "It may have been the whisper-or-will be was stinging its head off somewhere in the vicinity that evening; and then again, it may have been Lucie Baker. There's precious little you do, my friend, that Lucie doesn't broadcast to—well, my mother, for instance. She hasn't forgotten me."

"Would he say?"

Understand, for taking a detour from the straight and narrow path that leads to your front door; and in consequence . . ."

As he hesitated, Charman gave way to a peep of laughter in which he joined.

"I wonder why it is that our elders take our slights so much more deeply to heart than we do ourselves," said the girl at last. "Miss Lucie thinks she owns a piece of me, you know. In her opinion every man in Wickfield should be in love with me."

"She's not far off there," responded Jim gallantly. "But as for slights—why, I—I never . . ."

He was suddenly inarticulate, and Charman stretched out an impulsive hand, laying it on one of those that gripped the steering wheel; which unexpected contact caused the car to swerve.

"You don't owe me any explanation, Jimmy?"

"I think I do," he answered as she removed her hand, "but not on the subject of Clara Darling."

"About what, then?" asked Charman in alarm.

"They had reached Eastboro, and Jim answered, as he slowed up before the bank, 'I'll tell you some day,' but before she could ask more he had vanished within a side door that gave access to the building after banking hours."

On the way home, however, he skillfully managed to keep the conversation away from his own problem, and hers. He told of happenings at the bank that made her laugh—he asked questions about trivial things that kept her mind from her encounter with Deacon Purdie; and when he dropped her before the old Davis house at half-past five, Charman was a different girl from the discouraged teacher he had picked up an hour or so before.

"You're a good doctor, Jim," she said gratefully as she left him.

"Seems as if you'd been gone a week," commented Grandma, to whom Jim waved as he rode away.

"Not but what it's been sort of an exciting day, though. A man came across on his way to the White Manches riding one of those infernal machines—a motorcycle, I mean. I heard him coming from clear down the street, and he was walking on his saw, everything plain as day. It's a wonder he hadn't killed a dozen children, going such a rate; and just as he got here Lucie Baker's car ran across the road chasing the Gardner's Plymouth Rock rooster that had got loose among them."

"It was a bad combination, I'll admit that. You know how hens behave when they cross a street, and I can't see that roosters act much different if they do belong to the male sex. Anyhow that man on the motorcycle turned

up on his side, and he left him."

"Look here, Charman," his voice was the least bit husky, and his arms were folded across his chest in an effort to keep about from temptation.

"Don't let that worry you a minute. The doctor's on the school board, and he's more shame to Wickfield, but he's only one. Do you imagine that his word would weigh in the balance against the word of the other members, George K. and Doctor Howe? Don't let him scare you. Just stick to your guns and everything will be all right. Gosh! I wish you'd order me to break his ugly nose!"

Charman laughed. Already her troubles seemed miraculously lighter.

"You think I'm right then?" she questioned lightly.

"Of course you are! Cheer up, now, and relax. Shut your eyes, if you want to, and I won't bother you with talking. You need a rest."

The car moved forward, but though the girl closed her eyes obediently for a few moments, they wouldn't stay closed.

"There's no use my musing this lovely morning," she explained. "It seems even more gorgeous than usual to me; and Grandma's sure Miss Lucie's cut-out piece was never quite so gay."

"I think it's only that every year the coloring surprises us a little," replied Jim thoughtfully. We're used to seeing it all green. Then comes a frosty night and—presto change! We wake up and the scene's different, the way they tell it in a theatre."

"I believe you're getting poetic in your old age!" laughed Charman light-heartily.

"I must have taught it from you, then," he responded.

"She answered, a bit reproachfully: 'If you did, the infection can't be very recent. You're a good deal of a stranger these days, Jim Bennett.' He threw her a quick glance."

"I understood that your evenings were engaged."

"Entertaining your gentleman boarder," he answered honestly, and was furious to feel the color creep into his face."

"What would you have me do—look him in the wood shed or his office?" she retorted. "After all, Jim, a boarder is supposed to have the privilege of the family sitting

out so as not to hit the cat, and—
I suppose he must have hit something for the west head over heels and that contraption he was riding lying a-top of him with the engine running!"

"Was he killed?" gasped Charman.

(To Be Continued.)

Planning Bigger Airships

Could Be Constructed To Carry Paying Loads Says British Designer

Critics of the new airships were answered by Lieut.-Col. A. G. Richmond, the designer, and Major G. H. Scott, the navigator of R-101. They were the guests of the City-Library Club at a luncheon in the Carpenter's Hall, London, England.

Colonel Richmond said that he could see no reason technically why airships much larger than those of her fault should not be constructed to stand the stress of weather and to carry weight and paying loads.

The British Empire was, he thought, peculiarly suited to airship transport because of the long distances that had to be traversed over land and sea.

Economies, just as much a question of research as the building of the ships, was to be the next part of the program.

What will be the fare to India? You might as well have asked George Stephenson what would be the fare from Stockton to Darlington.

"Once speed has been achieved in conjunction with reasonable comfort, airship travel will become a necessity, and it is impossible to forecast what people will pay for a necessity."

It is equally impossible to put an estimate on the quantity and load of passengers. The factor of speed will create a demand."

None of the calamities predicted for the two new airships had, he said, come true. Both R-101, and R-100 had flown their trials in some of the worst weather ever recorded for October and November. "Finally," the Germans have now decided to copy us instead of our copying them."

On a new section, Colonel Richmond also said, was being put into R-101 to overcome the unexpectedly great weight of the engines and other components and after research would be conducted into the problem of long journeys across the sea.

Major Scott said it was quite wrong to say that hundreds of men were required to handle these ships. R-100 and R-101 had never had more than fourteen men to bring them to the mooring mast. In spite of all criticism, airship development had been a success, and what was now wanted was continuity of development. "We have to show that these ships are reliable and can run to schedule."

Slit From Carbon Dioxide

From carbon dioxide in the air eventually will be obtained wood pulp, artificial silk, paper, explosives and other material, said Dr. Herbert Levinstein, president of the Society of Chemical Industry, in an address to the British Institution of Chemical Engineers. Everywhere in the atmosphere and water vapour, he said, the same fundamental chemical constituent is found.

Douglas' Egyptian Liniment is especially recommended for spider, or infection of cow's teat. Invaluable also in cases of sprains, cuts and splits.

Would Solve House Problems

The perfect bridge hand is said to contain thirteen cards of one suit. Now if someone will work out a perfect mind hand, a perfect deck hand, a perfect harvest hand, some problems may be solved.

Customers—"It's like a nice birthday present for my son. He likes something to blow."

Helpful Merchant—"How about a good handkerchief?"

Inland Fisheries Show Gain In Production

Marketed Value Last Year In Manitoba Over Two Million Dollars

While agriculture, the basic industry of Manitoba, together with manufacturing, mining and other industries has advanced substantially in the province in recent years, the production from the inland fisheries, has probably shown the greatest gain. In the past five years the fisheries production has increased more than 170 per cent. In 1924 the marketed value of the fish caught in Lake Winnipeg, Manitoba, Winnipegosis and other lakes was \$1,252,000, while last year, it was \$2,654,000. In 1929 the commercial fishermen of the province caught 53,000,000 pounds of fish, a record for Manitoba, with a marketed value of \$2,654,000.

IS BABY TEETHING?

Teething time is a time of worry to most mothers. The baby is nervous, fretful. Fervent little gums are swollen and sore; the baby is constipated, calm and sometimes convulsions set in.

These troubles can be quickly banished, however, through the use of Baby's Own Tablets, earning which Mrs. Louis Grubb, Toronto, Ont., says: "I have used the Tablets for all my babies while teething and have found them a splendid medicine."

Baby's Own Tablets are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Bananas Grow in England

An exhibit which attracted considerable comment at the Royal Horticultural Society's Fruit Show, in London, England, was a bunch of bananas weighing nearly half a cwt., which had been grown in England.

This is the first time in 32 years that bananas grown in this country have been exhibited at one of the society's shows.

New Storage Elevator

It is reported from Ottawa that a 2,000,000 bushels interior storage elevator is to be built at Lethbridge by the Federal Government this year, supplementing private wheat storage facilities now existing in similar elevators at Saskatoon, Moose Jaw, Calgary and Edmonton.

A safe and sure medicine for a child troubled with worms. Mother Graves' Worm Exterminator.

Noisy Nucleuses

A Massachusetts court has ruled that airplanes flying less than 100 feet from the ground commit a trespass on the airspace right. But what are more interesting in discovering is how far our horizontal air rights extend, as against the neighborhood rule.

ZAM-BUK Marmellou For Healing Ulcers & Bad Legs

October 26, Montreal (Lat 23)

NO MORE STOMACH TROUBLE

"No more stomach trouble, gas and acidity," says Miss M. J. Marmellou, who has been suffering from "Stomach Trouble" for many years. "I have taken ZAM-BUK and my stomach is now normal. I have no more gas, acidity, or indigestion. I feel like a new woman."

Little Helps For This Week

"Changed into the same image from glory to glory,"—2 Corinthians iii. 18.

O hearts of level O souls that turn like sunflowers to the pure and best!

To you the trust is manifest: For who the mind of Christ discerns? Who, then, lifts John, upon his breast?

"John Greenleaf Whittier. Stand in your own right, and be true to His character, and you will be changed in spite of yourself, and unknown to yourself, into the same image, from character to character. He cannot help refusing; he cannot help showing the environment in which he has lived, the influences that have shaped his mind, his friendship, all love—human and Divine—his spiritual, so that it is no difficult in reflecting the character of Christ that we have never been in visible contact with Him. He does not appeal to the eye; He appeals to the soul, and is reflected, not from the body, but the soul."

—Henry Drummond.

Miller's Worm Powders are complete in themselves. They do not only drive worms from the system, but repair the damage that worms cause and so invigorate the constitution that it speeds recovery from the disorders of the digestive tract.

They are the result of the work of these genuine infusers. They do their work thoroughly and strength and soundness follow their use.

Survey Of Wood Waste

The Vancouver Forest Products Laboratory conducted by the Forest Service of the Department of the Interior, is engaged on a survey of wood waste in British Columbia sawmills with a view to assisting the industry in devising methods of profitable utilization of wood now wasted.

Gyproc Gives PERMANENT PROTECTION

MADE FROM Gypsum
rock, Gyproc Wallboard does not burn. And this year it has a new smooth ivory finish that needs no decoration (when mottled) although you can tint, paper or plaster it if you wish.

Structurally strong, inexpensive, easily and quickly put up, Gyproc Wallboard gives permanent fire protection to the walls, ceilings and partitions of your home.

Your dealer's name is listed below. Ask him for complete details of this pioneer Canadian fire safe Gypsum board or write for free interesting book, "Building and Remodelling with Gyproc."

The Ladies Aid of Gordon Memorial Church will hold an Ice Cream Social on the Church lawn on Wednesday, July 9th.

Messrs. A. J. Learmonth received sad word last Saturday announcing the death of their father who at the time of his death was living in England.

Pupils in high school and grade VIII are writing on their departmental examinations this week. School will close for summer holidays at the completion of the Exams.

That the Provincial guards to the banks, in connection with the Wheat Pool, has not yet been affected by the decline in grain prices was the opinion expressed by Treasurer J. E. Brownlee, Monday morning.

Ralph G. Rarick, who has been conducting revival services in the Brethren Church here for the past few weeks, concluded his engagement last Tuesday. Mr. Rarick reports a most successful and enjoyable visit to Redcliff. During the revival sixteen joined the church by baptism and through the advice of the mission board Mrs. Ethel Gale was licensed to preach the gospel.
